ABOUT US

ANGC established in the year 2010 in Riyadh, Saudi Arabia. ANGC team is largely involved in Steel Fabrication, Civil Construction, Electrical and Electromechanical, Erection, Automation and Décor Sectors. since the implementation by us has been connected with the quality of work and the speed of achievement. During the years of our growth, it has been our priority to maintain customer satisfaction by providing excellent services that meet the latest developments in the field of construction, commitment to achievement within the specified time and budget, and our work covers the residential, commercial, industrial and health buildings.

VISION

We are: committed to developing long lasting relationships with all our customers based on trust, integrity and unique performance. Our customer's satisfaction is one of the key measures for determining the effectiveness of the quality system and is measured through questionnaires and regular discussions/meeting. When required changes to process and procedures will be made to the account of customers' feedback. We are committed to development and training and competency of our people. All company employees have a responsibility for ensuring the intent of this quality policy is always adhered to and to contribute to improving the business.

VALUES

We have four simple values that guide our behavior and culture of innovation. Our values Permeate through everything we do, including our relationships with our client's our partners, our suppliers and the communities where we work

Safety first no compromise.
Client focus deliver on our promises.

Create opportunity for our people to excel.
Integrity - always doing the right thing.

WHAT WE DO

We are champion people, whether as individuals or teams. Our people constantly strive for better and always go that extra mile, inspiring each other and clients to innovate. We challenge convention, apply a can do attitude and are committed to quality and service excellence.

We employ an open and collaborative approach with our partners. This gives us a better perspective on how we can deliver cost-effective and beneficial outcomes for all stakeholders on every project, no matter how complex or challenging it is. We strive to find better ways to deliver for our clients, communities and the construction industry. We constantly challenge the status quo, make the seemingly impossible possible, and will always do so..

Services

CIVIL CONSTRUCTION DIVISION

A strong infrastructure is the very foundation of our societies, communities and nation. As budget tighten, and consumer pressure demands, money being spent more wisely, it's important to choose a civil construction company who delivers certainly in four critical areas: Schedule, Cost, Security and Quality, That's what we have been doing since our very first project and intend to take the same into Civil Construction as well. We're known for carefully managing every aspect of every construction project, collaborating to provide innovative solutions - and doing it all on time and on budget and providing peace of mind and security for our clients.

ANGC delivering less than the very best in never an option. The foundation of our communities and our nations depends on it. The geographical diversity, Project complexity, and public nature of civil work results in an exceptionally challenging industry that demands a high level of technical construction expertise. Whether building on land or over water, in busy cities or in remote areas, we have already proved our expertise and intend to use the same experience and knowledge take up Civil projects and display our finesse in the Civil Construction too.

We are committed to providing our clients with more than just construction. We approach every project as a partner to the Owner/Client (and their representative engineers) by exploring value engineering options, identifying the potential constructability issues, and being part of the solution when problems invariably surface during the course of the work. This is a direct benefit to our clients and has proven successful for our company, to date

Services

ELECTRICAL

We are proud of our timely execution of the Electrical Projects ranging from Installation, Testing & Commissioning of Industrial Production Machineries, Installation of power transformers and LV Rooms DB's and SMDB's, Cabling for high Capacity Machinery Conforming to the rules and regulations of State Converting authorities, Installation of power Generator's Industrial & Residential Electrical Wirings & Fitting of Decorative Lighting etc. It is in our ability to overcome all obstacles and allowing it to complete the projects on time with quality, that have brought in great satisfaction of our clients, to encourage us to do greater achievements in our endeavors.

Services

FABRICATION

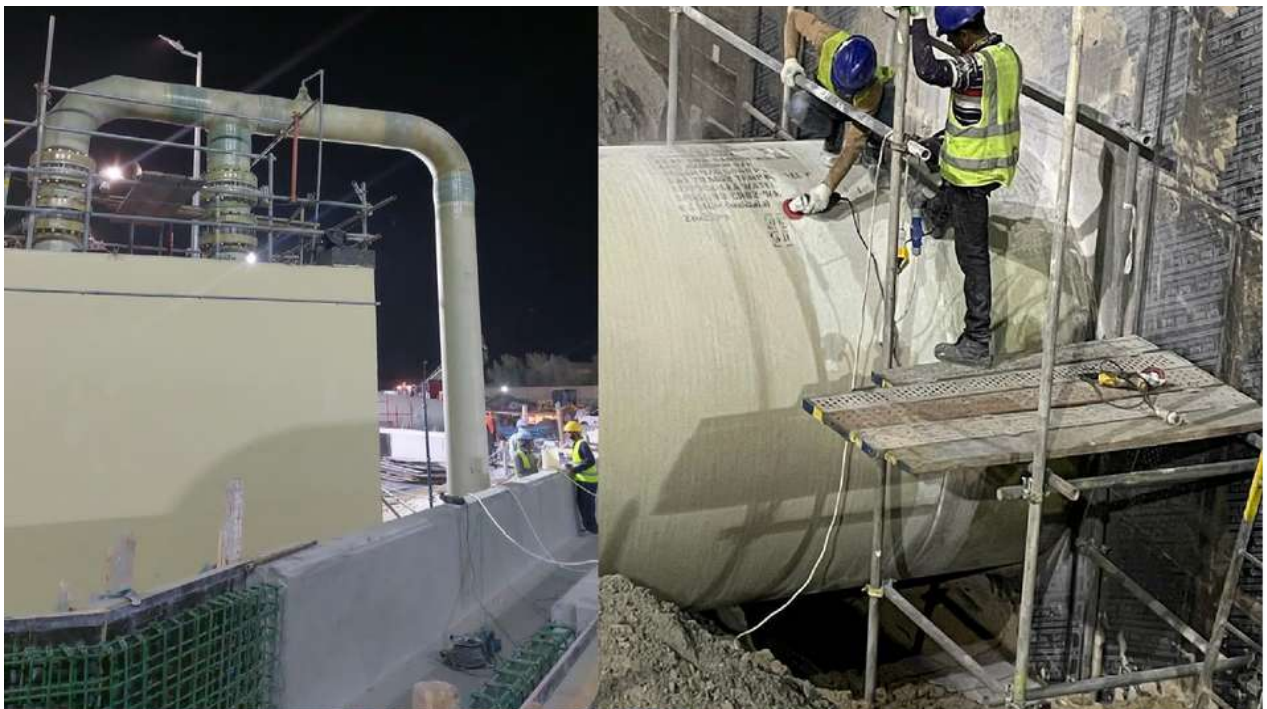

High-quality materials imported from all over the world are used in our joinery production. A myriad of combinations are available for interior application, which testify to the professionalism and expertise of our craftsmen and artisans. Each specification is carefully studied to extract the date, sequences and layouts. Which best satisfy the date, sequences and layouts. Which best satisfy the visual and aesthetic effects desired for the project in hand. Working with the designer, samples and layouts are scrutinized to ensure that the planned results are achieved. Our goals is to become an innovative and leading force in the Middle Ease in the field of joinery and Interiors for hotels, restaurants, malls, offices, showrooms, commercial buildings, villas etc. Our designs are aimed at creating pleasant and captivating environments whether for commercial or Residential Projects.

Services

PLUMBING AND DRAINAGE

ANGC has efficiently executed plumbing & drainage works on projects like multi-storied building, industries & Educational Institution. We offer our best possible design and working capacity backed by our in-depth knowledge of specific discipline and vast experience in the above field. In this field we take care and give maximum attention towards workmanship to see that the system we install results out to be leak proof. We are committed to implement equipment's & systems, which we install for its maintenance and services if any. We here with assure our customers of qualitative work and hence subsequently its good results.

Services

AIR CONDITIONING DIVISION

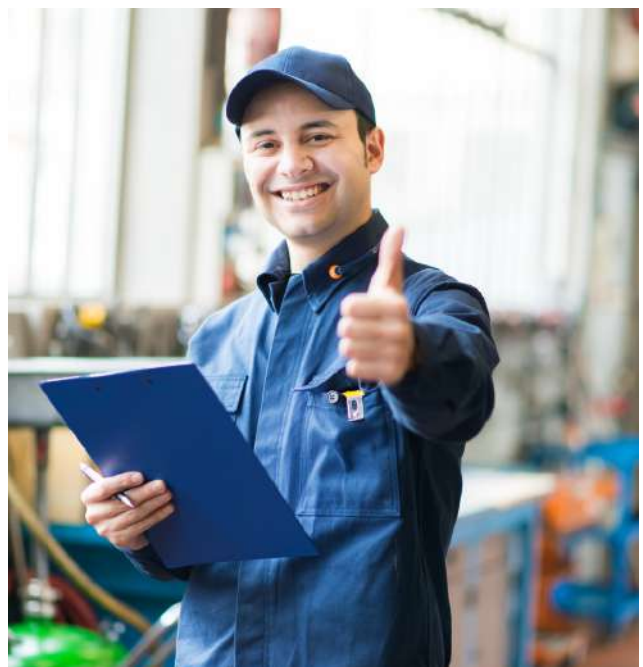

Our company has successfully completed several major chilled water: split ducted and package central air conditioning system for multi - storied buildings, Industries and educational Institution Projects in the K.S.A We are offering our design capacity backed by our in-depth knowledge of particular specified discipline and our experience in the above field and our company is always to stand behind the equipment and systems which we installed with total maintenance, services and repairing capabilities, Finally, we can give grater assurance of obtaining a quality central air conditioning system in the reasonable cost.

Services

MECHANICAL

ANGC has a successful history of execution of the mechanical projects ranging from Industrial Installations, Utility installations has its ability to overcome all obstacles allowing it to complete the Project on time with quality, and to the satisfaction of the client.

Services

HEAVY STRUCTURAL STEEL FABRICATION

Typical Applications	Superstructures Oil Refinery & Petrochemical Complex Water Treatment Plants Process & Industrial Plants Carbon Steel	Power & Desalination Plants Bridges & Commercial complexes
Material Of Construction		
Design/Construction Codes		
Fabrication Capability	Section Thickness - Up to 150 mm Single Order up to 5,000 MT Monthly Capacity of 2, 00 MT	
Our Scope	Preparation of Fabrication Drawings. Procurement of Materials. Complete Fabrication includes marking, cutting and edge preparation as per the required codes / standards. Welding & Fabrication as per specified code. Visual Inspections & Non Destructive Tests. Post Weld Heat Treatment (if required). Blasting & Painting as per project Specification. Complete QA/QC Documentation and as-built drawings. Completion of project Dossier and handing over.	

Services

GYPSUM PARTITION & CEILING CONTRACTING

With our vast experience of working with regular, moisture resistant, and fire-rated gypsum boards,

ANGC can install high quality drywall partitions at breathtaking speed. This, combined with the added experience of working with gypsum, mineral fiber, aluminum, and steel ceilings, has made

ANGC the premier partition and ceiling contractor in the KSA.

With over 10 years of extensive experience in commercial, Industrial, Medical and Residential

Constriction, Fidan is committed to providing you with the highest Level of Quality, Services,

SCOPE OF GYPSUM WORK INCLUDES

- Metal Stud Framing

Gypsum wall partitions

Decorative gypsum wall cladding

- Column wall partitions.

Acoustical wall paneling

Suspended ceilings

Acoustical Ceiling

How we Work

PROJECTS SUPPORT SERVICES

Under projects support services we have the facilities to provide experienced professional engineers & Technicians in Electrical Engineering, having tremendous experience Engineering, design, Construction and Maintenance of Medium & Low voltage Distribution Networks and substations.

ANGC has been associated with operation support services providing qualified Engineers, highly skilled technical manpower for Engineering, Procurement, reliable management, staffing, logistic and manpower solutions to several projects to various prestigious clients and also major private Oil & Gas, Petrochemical and Chemical industries.

ANGC while enjoying a steady growth has established itself as one of the leading employers in the Kingdom. Our goal is to exceed the expectations of every client by offering project support services, outstanding customer service, increased flexibility, and greater value. **ENGINEERING & CONSTRUCTION**

We provide the following services:

- 1) AutoCAD design drawings, Construction drawings & As-Built drawings for Civil, Mechanical, Electrical & Telecom.
- 2) Quantity Surveying for Civil, Mechanical, Electrical & Telecom projects.
- 3) Preparation of Project, Material & Construction Specifications.
- 4) Method of statements for Projects.
- 5) Preparation of Bid Packages

We have in-house Qualified & Experience professional to provide best professional services by complying the Client's requirements and standards.

WORK GALLERY

HEAVY FABRICATION

Heavy Fabrication is a type of fabrication that involves very large or oversized components and materials. Not all fabrication companies can handle heavy fabrication projects. they do handle heavy fabrication projects, they may not be able to complete smaller sub-tasks associated with the overall project.

HEAVY STRUCTURAL WORKS

Being one of the best organizations, we are offering Heavy Structural Fabrication Work. This service is executed by our skilled professionals using high grade tools and modern techniques. Our professionals check all the quality parameters associated to this service and perform the service in the best possible manner.

ALUMINUM WORKS

Advantage of the higher level in the aluminum trims and adds to the place a touch of beauty, both upscale business interfaces or domes or heavenly doors and windows to the content of the harmony and consistency between the glass and aluminum material. aluminum known widely in its commercial form as a light material and a strong and bright and has many features that make it an alternative for a lot of other minerals such as iron and copper in various uses.

ALUMINUM GLASS CLADDING

Advantage of the higher level in the aluminum trims and adds to the place a touch of beauty, both upscale business interfaces or domes or heavenly doors and windows to the content of the harmony and consistency between the glass and aluminum material. aluminum is known widely in its commercial form as a light material and a strong and bright and has many features that make it an alternative for a lot of other minerals such as iron and copper in various uses.

MAINTENANCE & REPAIR

The technical meaning of maintenance involves functional checks, servicing, repairing or replacing of necessary devices, equipment, machinery, building infrastructure, and supporting utilities in industrial, business, and residential installations.

PIPELINE

Pipelining is a key implementation technique used to build fast processors. It allows the execution of multiple instructions to overlap in time.

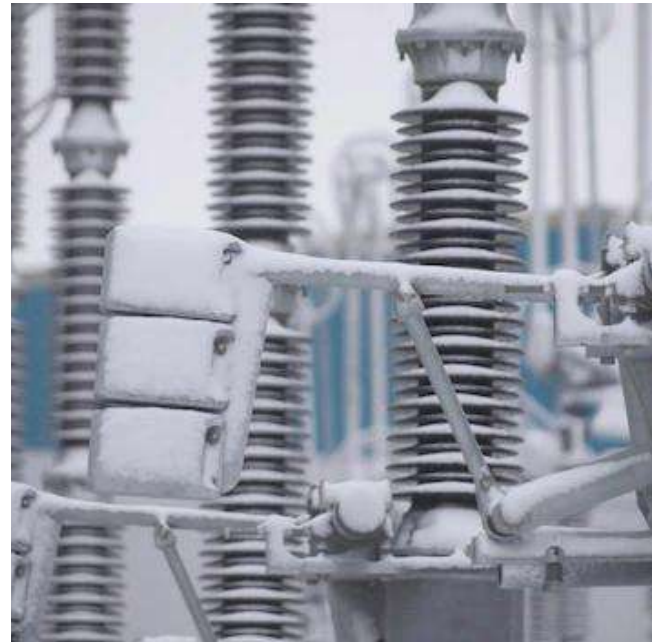

A pipeline within a processor is similar to a car assembly line. Each assembly station is called a pipe stage or pipe segment. The throughput of an instruction pipeline is the measure of how often an instruction exits the pipeline

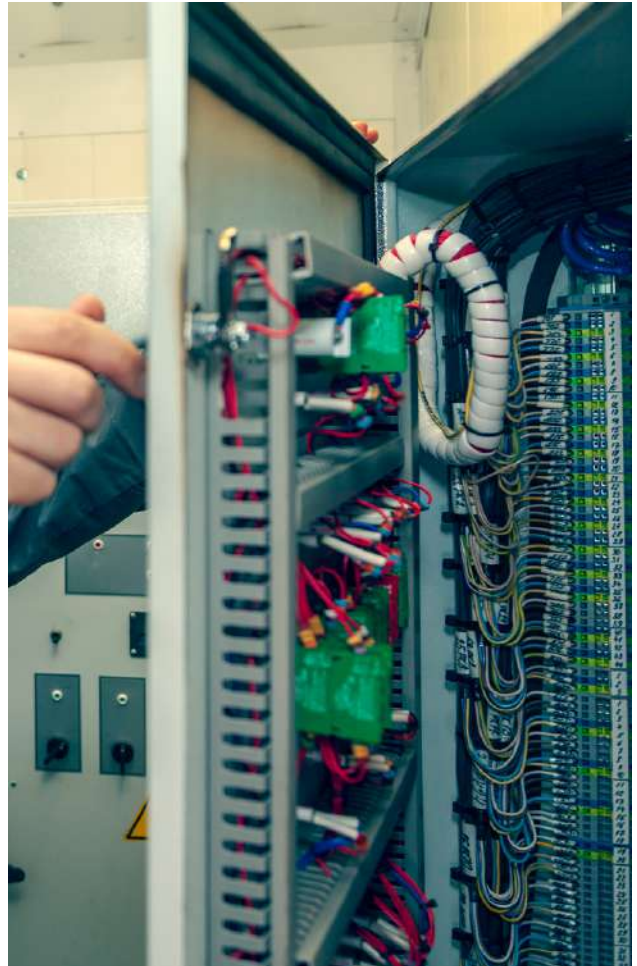

ELECTROMECHANICS

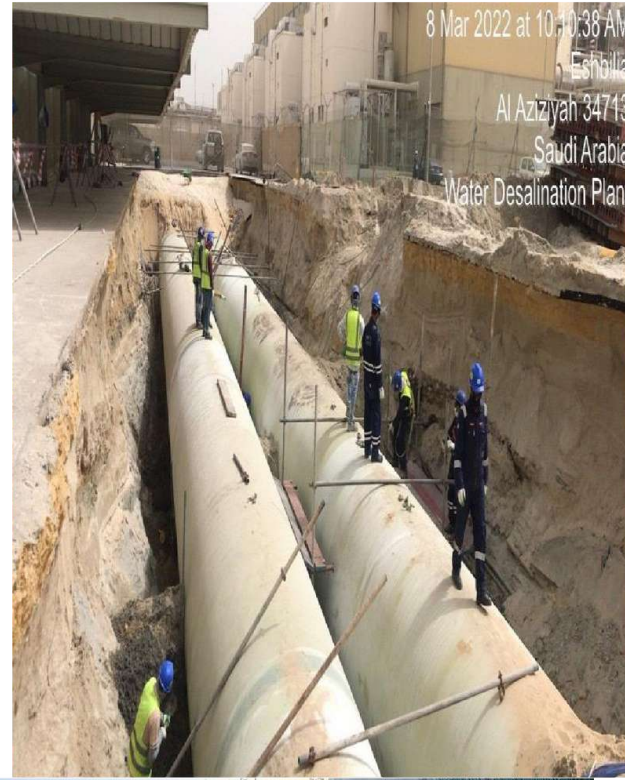

In engineering, electromechanics combines processes and procedures drawn from electrical engineering and mechanical engineering. Electromechanics focuses on the interaction of electrical and mechanical systems as a whole and how the two systems interact with each other. In engineering, electromechanics combines processes and procedures drawn from electrical engineering and mechanical engineering. Electromechanics focuses on the interaction of electrical and mechanical systems as a whole and how the two systems interact with each other.

CONSTRUCTION & LAYING PIPELINES FOR TELECOM

Pipe-jacking is a method for installing jacking pipes that serves as initial construction lining and excavation support, installed for stability and safety.

DUCT LINE

Ducts are conduits or passages used in heating, ventilation, and air conditioning (HVAC) to deliver and remove air. The needed airflows include, for example, supply air, return air, and exhaust air. Ducts commonly also deliver ventilation air as part of the supply air.

SPECIALIZED PLUMBING

offers reliable prompt service and quality workmanship. Even for those unplanned emergencies, we will have you covered with 24 Hour Emergency service. Please call us today to book an appointment.

OUR PLUMBING EXPERTISE INCLUDE

Residential

Industrial

Commercial

New Construction

Renovations

CLADDING WORK

Cladding is a process in construction of applying material over another to form a layer, the same way insulation is placed within the walls of a building. It is used to provide a degree of thermal insulation and weather resistance but also to improve the appearance of high-rise buildings.
